

# Plate Cleaner

---

## Power plus plate cleaner

### Features:

1. Strong removal of all printing pollution or dirty on plate (scratch, background, oxidation or other dirty pollution)
2. Improve the non-image area hydrophilic property, and help to form hydrophilic surface;
3. Clean the ink on the image area, and improve the ink receptivity;
4. It is suitable for different flat plate (PS plate, aluminum plate, zinc plate, etc).

### Application:

1. Shake well before use this product;
2. Clean the plate surface with a wet sponge, dipping with the cleaner(if massive amount of the cleaner is applied, before printing, it should be washed with water);
3. The bottle should be well covered after using.
